LOT 21 - Flex Solar Asset Tracker – TT600 - Solar powered tracker(RV, Trailer, Boat, etc.)

Description

Providing fleet managers with near real-time, detailed tracking information for assets such as trailers, containers and generators the solar powered asset tracker TT600 series is simple to install and provides visibility into the true utilization, dwell time, yard movements and yard entry and exit times of a fleet's important assets.

The solar powered asset tracker TT600 series by Flex utilizes GPS-based tracking to provide insight into asset usage and location via the MyGeotab platform. By leveraging the collected data, fleet managers gain near real-time, accurate visibility to help combat issues surrounding underutilization, effective lot management, maintenance and misplaced assets.
