

Sale Name: Friday night auction extravaganza; New, misguided freight, returns,
LOT 33 - EkkoHub Wireless Data Receiver

Description

EkkoHub Wireless Data Receiver

Collects and forwards data from up to 500 wireless EkkoSensors within a 20m radius. Multiple EkkoHubs can connect to an EkkoLink – which forwards data to the cloud-based EkkoSoft Critical over the WAN for visualization and analysis. Alternatively, an EkkoHub can connect directly to EkkoSoft critical to efficiently support Edge site monitoring.

Quantity: 1
