**LOT 67 - Optelec ClearView Speech**

**Description**

This is the Optelec ClearView Speech, an advanced electronic magnifier designed for individuals with low vision. It features a large display screen and intuitive controls. The magnifier is equipped with Optical Character Recognition (OCR) technology, allowing it to convert printed text into speech. The product typically comes with a durable stand and an adjustable camera for capturing documents. It also includes various connectivity ports for versatile use. Ideal for enhancing reading and viewing experiences, the ClearView Speech combines visual magnification with auditory feedback.

**Quantity:** 1
