

**Sale Name:** Chairs Limited Business Closure Auction - Owner Retiring

**LOT 63 - Manual Pallet Jack**

**Description**

This is a manual pallet jack, used for lifting and moving pallets in warehouses or storage facilities. The product features a metal frame, primarily in a yellow and black color scheme, indicating wear and signs of use. The handle is used for steering and pumping to raise the forks that slide under a pallet for lifting. The jack includes wheels for mobility, and it's designed to efficiently handle heavy loads. The condition suggests it has been well-used but remains functional for manual material handling tasks.

**Quantity:** 1
