LOT 72 - Rolling Ball Sculpture

Description

This is a rolling ball sculpture, also known as a kinetic sculpture or marble run. It consists of a metallic track where a ball rolls through various pathways and loops. The structure features a circular loop and an inclined path, supported by a wooden base. These sculptures are often used as desk toys or art pieces, designed to provide a visually engaging and dynamic experience. The finish is metallic with a polished look, and the base is a dark wood tone, providing a contrast to the shiny track.

Quantity: 1
