**LOT 360 - Projector Clock**

PROJECTOR CLOCK INSTRUCTION

Installation:  
1. Insert the "AA" size battery into battery compartment with correct (+/-) direction.  
2. Flip on and turn on the light. Turn the timer setting knob until the figure on dial is clear enough.  
3. Turn the time setting knob to time desired.  
4. Adjustment of light dial on wall can be high or low by rotating the height setting knob on button.  
5. Bulb changing: Screw off the opening knob. Open the top cover and you can change the bulb. Pls make sure DO NOT touch other accessories while taking this step.

## Description

This is a projector clock, which appears to project the time onto a surface. The main body is encased in a purple transparent material with a silver top. It includes a power adapter and requires a single "AA" battery for operation. Instructions are provided, detailing setup and usage, such as focusing and time setting, and a method for changing the bulb. The design is compact and functional, making it suitable for displaying the time in a unique and visible manner.

**Quantity:** 1
